Out in the world

A design cannot be considered in isolation from external constraints and stresses. This is why Tacchini maintains a dialogue so as to grasp and interpret the thoughts of its designers and of its clients. In the contract world, this enables it to express the quality of its products, using the best materials and complying with the strictest standards and certifications. Places of work or play, hotels, stadiums, wellness centres or shopping malls, all become the stage on which Tacchini can express the uniqueness of its designs, their durability, comfort and versatility. What’s more, the constant relationship with the modern world and the stresses it makes Tacchini a veritable seismograph of the state of being: an accurate sensor and promoter of new possibilities, bringing better living for all. Anywhere, out of the world.
