

Misura  
S, M, L, XL

Designed by Claesson Koivisto Rune, 2007  
Cat. Armchairs

 Tacchini

Misura S, M, L, XL

Designer: Claesson Koivisto Rune  
Year: 2007

A collection of chairs with a compact, dynamic aesthetic. Misura S is the smallest chair, and the most suitable to be used at a table, be it a dining table or one in a meeting room. Misura M and L are more roomy, comfortable armchairs, designed to meet the need for relaxation both at home and in waiting rooms. Misura XL is the biggest in the family, and is sofa size. It is suitable for home and contract settings, and is also available as a sofa bed.

Developed by Tacchini in Italy

Materials description

Internal frame: birch plywood 18 mm thick.

---

Padding: differentiated - density polyurethane foam.

---

Base: feet, glides or black embossed powder-coated metal swivel plate 8 mm thick.

---

Upholstery: non removable cover.

---

Suggested upholsteries

Silene

Leather

Erika

Erodium

Thesium

Dicentra

#### Materials informations

Polyurethane foam	42%
Soft plywood	40%
Upholstery	11%
Elastic belts	7%

#### Polyurethane

Flexible expanded polyurethane is a solid elastic polymeric material with open cell structure. It is a non-toxic material and above all free from ozone-damaging components. Production and processing of the polyurethane we use meet the objectives of the new policy of ensuring the protection of human health and of the environment. We focus in particular on the choice and use of the types of density of polyurethane suitable for preserving over the years the features of load capacity, elasticity and resilience. For products used in public spaces flame-retardant expanded polyurethane is chosen, tested and certified according to international regulations.

#### Elastic belts

The elastic belt used on the seats of our upholstered products is a component to be chosen with care in order to ensure adequate elasticity and springing for the dimension and the structure of the product. We use plaited elastic webbing to add greater comfort and resistance to weight stresses.

#### Foam

Similar to polyurethane, foam is used for moulding products with special and organic shapes. It is a material which is highly resistant to ageing and flames. Its appearance at the edges is clean, compact. All products made with a foam structure offer a solution with extraordinary comfort.

#### Recyclability

All Misura S, M, L, XL elements are 100% recyclable when fully separated. Tacchini undertakes on-going research and development, with efforts made to introduce products which are a perfect combination of function and safety without jeopardizing the final design of the same articles. During production attempts are made to minimize noise and emission levels and to reduce rejects as far as possible. All the single materials which make up the production process, once disassembled, can be reused several times, maintaining a high quality standard.

#### Packaging

Misura S, M, L, XL element is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated.
