

Ruler

Designer: Gordon Guillaumier
Year: 2012

The slim top and distinctive legs are the key features of Ruler coffee tables. Tops can be round, square, rectangular or hexagonal. With simple shapes but sophisticated materials and skilled production processes, Ruler looks right at home in a wide range of settings, where it can be used alone or combined with the other tables from the same collection.

Materials description

Base: composed by ash wood legs lacquered walnut.

Top: 12 mm thick (20 in the middle) in marble. Anti-stain marble treatment available on request.

Base

T44
Light Walnut

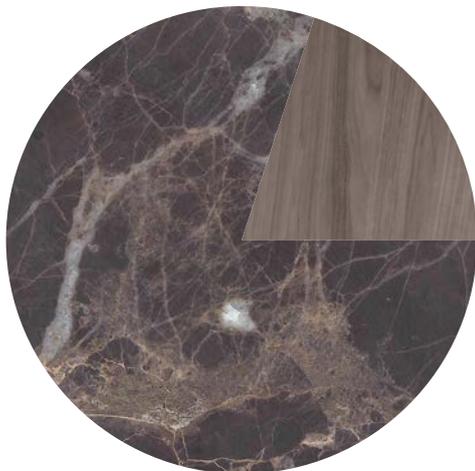

Top

T33
Matt Black Travertine

T34
Shiny Biancone

Materials informations

Marble

Marble is a natural material obtained through a metamorphic process from sedimentary rock such as limestone or dolomite, causing crystallisation of the calcium carbonate. The specific features of the material can be seen in the marble we use which is worked by artisans with machinery and polished with natural waxes which go to respect the actual essence of the nature of the marble.

Wood

Wood is a renewable raw material. All products derived from wood, such as for example plywood, have the advantage of being able to be machined more easily than wood and do not deform. The timber we use – solid or plywood – comes mainly from European and Russian forests and is seasoned to specific values of humidity with tests. Most of the structures of the products in the collection have a frame in solid pine or ash, or in beech or poplar plywood.

Marble top	80%
Wooden feet	20%

Recyclability

All Ruler elements are 100% recyclable when fully separated. Tacchini undertakes on-going research and development, with efforts made to introduce products which are a perfect combination of function and safety without jeopardizing the final design of the same articles. During production attempts are made to minimize noise and emission levels and to reduce rejects as far as possible. All the single materials which make up the production process, once disassembled, can be reused several times, maintaining a high quality standard.

Packaging

Ruler element is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated.

Gordon Guillaumier

Gordon Guillaumier was born in 1966, and was educated firstly in Malta, then in Switzerland, England and Italy. He graduated from IED in Milan (1988-91), before specializing in design at the Domus Academy, Milan (1992). In 1993 he began working with Baleri Associati, as well as collaborating with architect Rodolfo Dordoni. In 2002 he set up his own design studio in Milan, principally working on product design, but also for design consultancy projects. In 2006 he lectured in industrial design at Milan's Politecnico university.

Other products by Gordon Guillaumier: Cage, Chill-Out, Chill-Out Armchair, Chill-Out High, Chill-Out Table, Coot, Face to Face, Ledge, Soap, Spindle.
