Babela

Designed by Achille + Pier Giacomo Castiglioni, (1958) 2010. Cat. Chairs
Babela

Designer: Achille + Pier Giacomo Castiglioni
Year: (1958) 2010

Designed in 1958 by Achille and Pier Giacomo Castiglioni for the Milan Chamber of Commerce, Babela is an excellent example of how practicality and aesthetics can work together in the same chair, a comfortable, stackable easy chair with a rigorous design perfect for the institutional setting for which it was conceived. This reissue brings Babela into contemporary spaces, transforming the original iron frame into a warmer, more natural ash wood one.

Developed by Tacchini in Italy
Year: 2010

Dimensions (cm)
Cod. OBAB56

W 56 D 59 H 80 cm
H seat 49 cm

Removable covers

Materials description

Internal frame: birch plywood 15 mm.

Padding: differentiated - density polyurethane foam.

Base: open-pore lacquered ash wood.

Upholstery: fully removable cover.

Stackable chair.

Painted base

T43 Dark Walnut
T45 Natural
T46 White
T47 Black
T48 Grey

Suggested upholsteries

Cannell
Cassia
Davidia
Daylily
Draba
Doritis

Recyclability

All Babela elements are 100% recyclable when fully separated. Tacchini undertakes on-going research and development, with efforts made to introduce products which are a perfect combination of function and safety without jeopardizing the final design of the same articles. During production attempts are made to minimize noise and emission levels and to reduce rejects as far as possible. All the single materials which make up the production process, once disassembled, can be reused several times, maintaining a high quality standard.

Polyurethane

Flexible expanded polyurethane is a solid elastic polymeric material with open cell structure. It is a non-toxic material and above all free from ozone-damaging components. Production and processing of the polyurethane we use meet the objectives of the new policy of ensuring the protection of human health and of the environment. We focus in particular on the choice and use of the types of density of polyurethane suitable for preserving over the years the features of load capacity, elasticity and resilience. For products used in public spaces flame-retardant expanded polyurethane is chosen, tested and certified according to international regulations.

Wood

Wood is a renewable raw material. All products derived from wood, such as for example plywood, have the advantage of being able to be machined more easily than wood and do not deform. The timber we use – solid or plywood – comes mainly from European and Russian forests and is seasoned to specific values of humidity with tests. Most of the structures of the products in the collection have a frame in solid pine or ash, or in beech or poplar plywood.

Packaging

Babela element is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated.

The Castiglioni studio was established in 1938 by brothers Livio and Pier Giacomo, while for certain projects, Luigi Caccia Dominioni also worked alongside them. In 1944 Achille joined the studio: the partnership between the three brothers continued until 1952, when Livio set up on his own, while continuing to work with Pier Giacomo and Achille for some special projects. Achille and Pier Giacomo worked together without any clear division of roles, but with equal participation, and constant discussion and exchange of ideas. This collaboration continued until Pier Giacomo died in 1968. Achille continued to work in the same way as he always had done with his brother, and indeed it is almost impossible to detect any difference in his approach to projects, other than the natural social and technological changes that came about with the evolving times.

Other products by Achille + Pier Giacomo Castiglioni: Sancarlo.
