Chill-Out Armchair

**Designed by Gordon Guillaumier, 2013**

**Cat. Armchairs**

Chill-Out is a system of sofas and armchairs that can stand alone or create a vast range of different linear or corner compositions. It features a light, slim base and cosy, comfortable cushioning, to which back and armrests can be added. An ideal combination both for domestic and collective spaces, particularly in the version with a built-in coffee table.

Developed by Tacchini in Italy

Chill-Out Armchair
designed by Gordon Guillaumier, 2013
Cat. Armchairs

Materials description

Internal frame: poplar plywood 18 mm thick.

Padding: differentiated-density polyurethane foam.

Base: tubular metal base Ø 16 mm, available matt chromed or power-coated painted.

Upholstery: non removable cover.

Materials informations

- **Polyurethane**
  Flexible expanded polyurethane is a solid elastic polymeric material with open cell structure. It is a non-toxic material and above all free from ozone-damaging components. Production and processing of the polyurethane we use meet the objectives of the new policy of ensuring the protection of human health and of the environment. We focus in particular on the choice and use of the types of density of polyurethane suitable for preserving over the years the features of load capacity, elasticity and resilience. For products used in public spaces flame-retardant expanded polyurethane is chosen, tested and certified according to international regulations.

- **Wood**
  Wood is a renewable raw material. All products derived from wood, such as for example plywood, have the advantage of being able to be machined more easily than wood and do not deform. The timber we use – solid or plywood – comes mainly from European and Russian forests and is seasoned to specific values of humidity with tests. Most of the structures of the products in the collection have a frame in solid pine or ash, or in beech or poplar plywood.

- **Marble**
  Marble is a natural material obtained through a metamorphic process from sedimentary rock such as limestone or dolomite, causing crystallisation of the calcium carbonate. The specific features of the material can be seen in the marble we use which is worked by artisans with machinery and polished with natural waxes which go to respect the actual essence of the nature of the marble.

- **Metal**
  The need to combine complex yet lightweight shapes with resistant materials necessarily involves the use of metals such as steel and aluminium. Products in polyurethane foam are made with an inner steel frame for adding strength to the structure. The bases are in tubular metal which can be chromed with a gloss or satin finish or painted with epoxy powders.

Recyclability

All Chill-Out Armchair elements are 100% recyclable when fully separated. Tacchini undertakes on-going research and development, with efforts made to introduce products which are a perfect combination of function and safety without jeopardizing the final design of the same articles. During production attempts are made to minimize noise and emission levels and to reduce rejects as far as possible. All the single materials which make up the production process, once disassembled, can be reused several times, maintaining a high quality standard.

Packaging

Chill-Out Armchair element is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated.

Gordon Guillaumier was born in 1966, and was educated firstly in Malta, then in Switzerland, England and Italy. He graduated from IED in Milan (1988-91), before specializing in design at the Domus Academy, Milan (1992). In 1993 he began working with Baleri Associati, as well as collaborating with architect Rodolfo Dordoni. In 2002 he set up his own design studio in Milan, principally working on product design, but also for design consultancy projects. In 2006 he lectured in industrial design at Milan’s Politecnico university.

Other products by Gordon Guillaumier: Cage, Chill-Out, Chill-Out High, Chill-Out Table, Coot, Face to Face, Ledge, Ruler, Soap, Spindle.
