Slalom

Designed by Pietro Arosio, 2002
Cat. Chaises-longues

A chaise-longue with extremely elegant and ergonomic form and which is able to offer a surprising versatility. It can be set to a different position of inclination simply by rotating the base. The head rest can be fixed in various positions by means of a simple magnet.

Developed by Tacchini in Italy

Dimensions (cm)
Cod. OSLA56

W 56 D 160/168 cm
H 98/78 cm
H seat 31/19 cm

Non-removable covers CAD Files:

Materials description

Internal frame: cold foam with metal inserts with magnets.

Headrest: metal thin plate covered by differentiated-density polyurethane foam.

Base: stainless steel base. Two positions possible rotating the base.

Upholstery: non removable cover.

Base

T24
Satin Chrome

Suggested upholsteries

Leather  Divina  Erika
Flexible expanded polyurethane is a solid elastic polymeric material with open cell structure. It is a non-toxic material and above all free from ozone-damaging components. Production and processing of the polyurethane we use meet the objectives of the new policy of ensuring the protection of human health and of the environment. We focus in particular on the choice and use of the types of density of polyurethane suitable for preserving over the years the features of load capacity, elasticity and resilience. For products used in public spaces flame-retardant expanded polyurethane is chosen, tested and certified according to international regulations.

The need to combine complex yet lightweight shapes with resistant materials necessarily involves the use of metals such as steel and aluminium. Products in polyurethane foam are made with an inner steel frame for adding strength to the structure. The bases are in tubular metal which can be chromed with a gloss or satin finish or painted with epoxy powders.

Similar to polyurethane, foam is used for moulding products with special and organic shapes. It is a material which is highly resistant to ageing and flames. Its appearance at the edges is clean, compact. All products made with a foam structure offer a solution with extraordinary comfort.

Slalom is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated.
Pietro Arosio was born in 1946 in Lissone, near Milan. He learnt his profession at the research centre of a company specialising in the production of metal furniture for communal spaces. This experience led to the emergence of a design philosophy that developed over time through his work as an industrial designer. He began his career in 1972, and was already winning accolades in 1983, receiving the Casaviva d’Oro award. The fundamentals of his work include essentiality, research into new materials and technologies, and attention to detail and to the engineering implications of his designs. Pietro Arosio is fully aware of the emotional impact his products can have, and has worked in partnership with various internationally-acclaimed artists, including Nespolo, Del Pezzo, Hsiao Chin, Tilson, Rotella and Keizo. A number of his pieces have been exhibited at the Victoria and Albert Museum in London, and at the Munich modern art museum Die Sammlung.

Other products by Pietro Arosio: Happy Hour, Intercity, Moon, Nastro, Parentesi, Pick Up, Quadro, Sliding, XL.
