Chill-Out Table

Designer: Gordon Guillaumier
Year: 2013

A system of sofas, armchairs and coffee tables, inspired by the themes of freedom, simplicity and lightness, Chill-Out are ideal for domestic or collective spaces, on their own or in a linear or corner composition. Featuring slim yet comfortable and cosy volumes, the upholstered pieces are accompanied by coffee tables in Carrara or Basaltina marble, with an elegant matt finish: a historic material that adds both value and charm to this refined, contemporary design.

Developed by Tacchini in Italy

Cat. Low Tables

Recyclability
All Chill-Out Table elements are 100% recyclable when fully separated. Tacchini undertakes on-going research and development, with efforts made to introduce products which are a perfect combination of function and safety without jeopardizing the final design of the same articles. During production attempts are made to minimize noise and emission levels and to reduce rejects as far as possible. All the single materials which make up the production process, once disassembled, can be reused several times, maintaining a high quality standard.

Packaging
Chill-Out Table element is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated.

Marble
Marble is a natural material obtained through a metamorphic process from sedimentary rock such as limestone or dolomite, causing crystallisation of the calcium carbonate. The specific features of the material can be seen in the marble we use which is worked by artisans with machinery and polished with natural waxes which go to respect the actual essence of the nature of the marble.

Metal
The need to combine complex yet lightweight shapes with resistant materials necessarily involves the use of metals such as steel and aluminium. Products in polyurethane foam are made with an inner steel frame for adding strength to the structure. The bases are in tubular metal which can be chromed with a gloss or satin finish or painted with epoxy powders.

Gordon Guillaumier was born in 1966, and was educated firstly in Malta, then in Switzerland, England and Italy. He graduated from IED in Milan (1988-91), before specializing in design at the Domus Academy, Milan (1992). In 1993 he began working with Baleri Associati, as well as collaborating with architect Rodolfo Dordoni. In 2002 he set up his own design studio in Milan, principally working on product design, but also for design consultancy projects. In 2006 he lectured in industrial design at Milan's Politecnico university.

Other products by Gordon Guillaumier: Cage, Chill-Out, Chill-Out Armchair, Chill-Out High, Coot, Face to Face, Ledge, Ruler, Soap, Spindle.
