

## PLUTO (Low Table) design Studiopepe

Available in two sizes, the sculptural shapes and bold details of the Pluto coffee tables have a cubist air about them. Made of a solid wood table top with bullnose edge and three massive concrete legs of different diameters that lend the table vertical momentum, its appearance seems to change depending on the viewer's perspective.

### The Company

Tacchini is a design company, specialised in the creation of furnishings with a unique and refined style.

Tacchini is a family history. Founded by Antonio Tacchini in Brianza in 1967, in a historical period of great creative ferment, where Made in Italy manufacturing excellence is enriched with new aesthetic and functional visions on living domestic environments, the company has always placed the idea at the centre of every creative moment, from abstract thinking to the three-dimensionality of the object, to then become the essence of living.

Tacchini is a reference point in the Made in Italy furniture sector, thanks to its constant stylistic and functional research, project and the product culture, care for people and the environment. The link with the contemporary world is enhanced by the choice of high-quality materials and constantly updated production technologies, which, however, never lose sight of the tradition they derive from, thus avoiding the possibility of confusing style with fashions and design with simple series production.

Tacchini aims to improve the quality of private and public spaces, in a world where needs, technologies and lifestyles are constantly changing. This is the reason why Tacchini researches and improves its products and services tirelessly, with passion, creativity and responsibility. The result is an uninterrupted "work in progress" of versatile and original solutions, adaptable to any environment and situation, capable of arousing emotions day by day, and lasting over time.
